

Rapidwerks LLC  
7444 West Wilson Ave  
Chicago, Illinois 60706

November 6, 2003

FOR IMMEDIATE RELEASE

### **RAPIDWERKS ISO Certification:**

Rapidwerks is now **ISO 9001:2000** certified. This globally accepted standard ensures that our products meet or exceed customer requirements and expectations.

To earn this certification, Rapidwerks was inspected by an impartial auditor **Underwriters Laboratories Inc. (UL)**. UL is one of the most recognized, non-for-profit, reputable conformity assessors in the world for more than a century. UL's seasoned quality registrars reviewed the development and implementation of our extensive quality management system.

Rapidwerks Quality Management System defines the process and quality management techniques of key business areas, from customer interaction and satisfaction to product realization, supplier management and order fulfillment. It also provides standards for us to meet or exceed, and allows for continued improvement based on innovations, industry trends, and our customers' needs.

The ISO 9001:2000 certification serves as impartial and public appraisal of Rapidwerks managed procedures and products. Our continued compliance with the standards will ensure that we will provide the highest-quality precision micro injection molding components to the industries we wish to serve. Customers can be confident that management and all employees at Rapidwerks pledge to uphold the principles of our **Quality Policy**:

AT RAPIDWERKS WE ARE COMMITTED TO ONGOING TOTAL QUALITY IMPROVEMENT TO ACHIEVE BUSINESS OBJECTIVES AND EXCEED CUSTOMER EXPECTATIONS.

**About Rapidwerks LLC:** Rapidwerks serves manufacturers of medical devices and equipment, automotive equipment and accessories, mobile electronics, and telecommunications products. The company offers a variety of services that include design and engineering, prototyping, precision injection molding, microinjection molding, insert molding, tool building, fabrication, and contract assembly. Rapidwerks also uses stereo lithography to quickly fabricate 3-D concept models.
